## PUBLIC MEETING NOTICE

Guilford County School District (District) is conducting a study that will examine the procurement of services and products, the subcontracting participation of prime contractors/service providers who do business with the District and in the private sector, and the anecdotal evidence collected from a broad cross section of all firms doing business with or interested in doing business with the District. The District has contracted with MGT of America to conduct the study which will provide a review of the District's current M/WBE program. Individuals and businesses are invited to learn about this disparity study (forum) and provide testimony of doing business or attempting to do business with the District (hearing).
