

THE BUSINESS OPPORTUNITY THAT YOU'VE BEEN LOOKING FOR...

Skanska Rentenbach is changing the face of construction and we want you to join us!

We invite all HUB contractors and suppliers to learn about opportunities to work with Skanska Rentenbach on the following project:

University of North Carolina at Greensboro (UNCG) Student Recreation Center

The new Student Recreation Center comprises approximately 223,000-SF within its three-story volume and also includes a 6,000-SF central utility plant onsite. This targeted LEED Silver certified building contains an indoor jogging track, multipurpose gymnasiums, racquetball courts, a climbing wall, natatorium and an administrative suite. The design of the Student Recreation Center will interface with the existing UNCG campus and address the long-term needs of the campus for recreational opportunities for students and faculty. The projected construction budget for the Student Recreation Center is \$69,800,000.

Construction of the project is anticipated to begin during the first quarter of 2014 with completion in early 2016. Skanska Rentenbach will begin developing and distributing bid packages in early 2014.

For project/bidding information, please contact:

Melanie Moreschi, Senior Estimator, at 919.941.7922
