

Stough Elementary School

Invitation for:

Historically Underutilized, Disadvantaged, Minority, and Women Business Enterprises, Supplier and Trade Partner outreach event for the upcoming Stough Elementary School. The purpose of this meeting is for interested companies to learn how to do business with us, understand our processes, meet our team members, provide information on the project and to get to know you.

Project Information:

The new Stough Elementary School is based on Wake County's 44 teaching space model and will have a maximum capacity of 644 students, upon completion, with no future mobiles or expansion. This will accommodate Kindergarten through Fifth Grade, as well as Pre-k and Adaptive Curriculum spaces. The school will be located on an approximately 14-acre site that Stough Elementary currently occupies. The site is located on Edwards Mill Road near Parklake Ave. The existing school will be demolished, and a new elementary school will be built in its place. The building will be steel framed. Exterior walls will be comprised of traditional cavity wall construction. Exterior veneer materials include brick and ACM panels. Back-up walls are either metal studs with mineral wool and gypsum drywall or CMU at the dining/play area. The new layout will incorporate smooth carpool and bus loading, covered pickup and play areas, a screened loading and service area, improved outdoor gathering spaces and play surfaces with unique play spaces for different age groups.

The meeting will take place on:

Wednesday, February 13th, 2019 from 4:00 p.m. to 5:30 p.m.

Meeting Location:

WCPPS Facilities Design & Construction
1429 Rock Quarry Rd.
Suite 116
Raleigh, NC 27610
