- Supplemental Documents (Attach all that apply)
- Scaled drawings showing the location, dimensions, elevations of existing and proposed topographic alterations, existing and proposed structures, in relation to floodplain areas and sea level rise inundation areas. Including lowest floor elevation (including basement) of all proposed structures.
 - Effective FIRM map with project site location delineated.
 - Supporting hydraulic and hydrologic calculations and modeling, reports, certifications, and other supporting data used as a basis of design for the proposed development.
 - If floodproofing, a Floodproofing Certificate (FEMA Form FF-206-FY-22-153 or succeeding forms) with supporting data (i.e. product data sheets, operational plan, maintenance and inspection plan).

The undersigned, acting as the design professional representative of the Owner, hereby makes an application for a permit to develop in a designated floodplain area. The work to be performed is described above and in attachments hereto. The undersigned agrees that all such work shall be in accordance with the requirements of the Uniform Floodplain Management Policy for State Property and with all other applicable federal programs/requirements, and the laws and regulations of the State of North Carolina.

This permit is issued with the condition that the Applicant will provide all necessary certifications to the State Construction Office in accordance with Article 4, Section B(3). These certifications include an Elevation Certificate from a Registered Engineer or Land Surveyor, documenting the lowest floor (including basement) elevation of any new or substantially improved structure covered by this permit. Additionally, a Certification of Compliance is required to be filled with the SCO prior to occupancy of any structure.
